YOLOv8n-KITTI Tucker-2 sensitivity per layer and mode

One k x k conv decomposed at a time, other mode at full rank; 500 val images; adaptive BN when the raw drop > 0.2 points.
Reference 68.44 mAP50-95. Sorted by mean drop over all step-8 ranks; negative drops shown as 0.

Rank kept in the decomposed mode (rank / channels)

	12.5%	25%	37.5%	50%	62.5%	75%	87.5%	100%
